

London Sustainability Exchange

## London Sustainability Exchange Values Statement

### Supported by:

### Partners:

MAYOR OF LONDON

We are inspired by the world in which we live and those with whom we share it. We celebrate the indivisibility of all life forms on Earth, are committed to the pursuit of equity, and seek to act justly in all we do. Our values are central to our work: they are inherent in our vision of a more sustainable world, and they guide us on the path we take towards that vision and in our everyday work.

### **Commitment**

We are dedicated to accelerating the building of a sustainable way of life, taking a positive, solutions-orientated approach. We pursue this goal with vision, enthusiasm and energy, inspiring and motivating each other and our partners.

### **Respect**

We value the inherent uniqueness of individuals, the different contributions they make, and the richness brought to our work by a diversity of cultures, backgrounds, opinions and ideas. We promote a working environment in which people feel able to express differing views openly; we seek to build consensus and to act with tolerance, fairness and empathy.

### **Co-operation and Learning**

We strive to build a holistic, mutually supportive and creative environment in which we foster each other's development, and share our skills, knowledge and experiences. Partnership, participation, consultation and dialogue are core to the way in which we operate.

### **Openness**

We believe in truthfulness and seek to maximise transparency in our working relationships. We openly acknowledge and learn from our mistakes.

### **Fun**

We believe work should be fun. We appreciate humour, and seek to create an enjoyable and friendly working environment.
